FLOORING XTRA

Hardwood Floor Construction

25 Year Structural Integrity Warranty
15 Year Limited Surface Warranty

STATE OF THE ART PRODUCTION TECHNIQUES

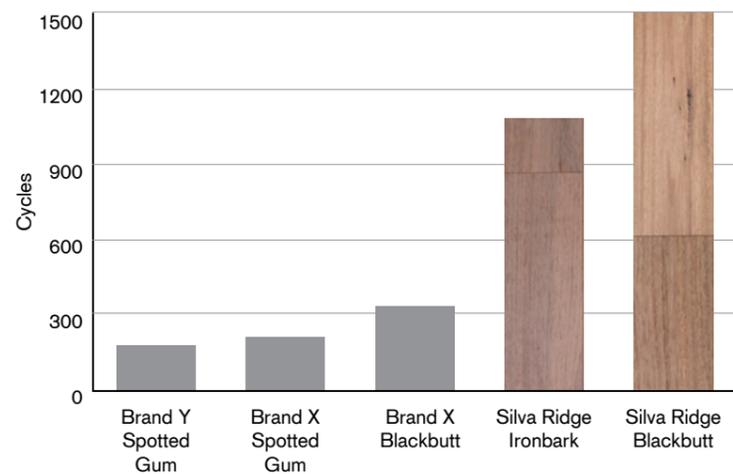

Silva Ridge incorporates the latest techniques in engineered flooring construction – from its incredibly hard wearing 9 coat system, it's conservative use of the hardwood resource, through to the plantation eucalypt plywood core.

Silva Ridge has been engineered to be aesthetically beautiful, respectful to the environment, while providing a tough, dependable hardwood engineered flooring.

ABRASION TEST

Surface abrasion test of leading Australian hardwood engineered flooring brands.

The abrasion test uses an abrasive on a wheel and measures the number of cycle revolutions that is required to wear through the coating to bare wood. The higher the number of cycles the more abrasive resistant the coating is to wear.

* Testing has been commissioned by our manufacturer and has been conducted in laboratory conditions by an independent party.

Environment

Using veneer only sourced and selected from sustainable managed forests, Silva Ridge ensures the product maximises the precious resource. The core material used in Silva Ridge is manufactured using plantation Eucalypt hardwood.

9 Coat System

Silva Ridge uses a state of the art European coating system, utilising 9 separate coats to ensure a tough, anti scratch surface is obtained. Silva Ridge has a very attractive matt/brushed appearance.

25 Year Warranty

Silva Ridge carries a 25 year warranty on the construction of the product in domestic applications. This ensures you have peace of mind that Silva Ridge is strong, stable and won't fall apart.

Real Hardwood Surface

Silva Ridge is constructed using the highest quality hardwoods which ensures an aesthetically attractive surface that is extremely strong.

Matching Accessories

Complete Flooring Australia stocks a collection of anodised and powder coated trims, MDF wrapped scotia and foam underlay designed to aid in the completion of your flooring system.

WALK on your very own REAL Hardwood floor today!

Silva Ridge is an engineered hardwood floor, which means that the surface you see is made of strong hardwood, while underneath the surface Silva Ridge uses an extremely stable 9 ply construction made of plantation Eucalypt. This type of construction ensures the maximum use of our precious hardwood, which in turn is better for the environment.

Recoating Engineered flooring

The surface coating on Silva Ridge can be recoated if it becomes worn or scratched.

Recoating is a different process than “sanding” an engineered floor and if you are looking to use a thicker veneer due to the fact that you think you will be able to sand the floor, be aware.

1. A large amount of people think they will sand their engineered flooring in years to come, but very few actually do.
2. Prefinished engineered floors are not easily sanded – due to the toughness of the coating, it is normally very expensive to have a floor sanded back to bare wood.
3. Some engineered floors are stained and have features and scrapings that if they are sanded the floor will look entirely different.
4. Engineered floors are not designed to have high speed heavy sanding machines operating on top of them, this can lead to further problems like delaminating **and some manufacturers may void their warranties if the product is sanded.**

**Loba WS 2K Contact is Waterborne sealer for recoating of factory prefinished floors. Available from Loba Australia.

Species	Blackbutt, Spotted Gum, Brush Box, Ironbark	Silva Ridge Oak
Core Material	Plantation Eucalypt	
Locking System	Välinge 2G glueless joining system	
Profile	Micro Bevel (ends and sides)	
Size	136mm x 12mm	165mm x 12mm
Wear Layer	0.6mm	
Length	1,830mm	
Surface	Brushed	
Coating	9 Coats incorporating Aluminium Oxide	
Finish	Matt	
Coverage	136mm x 1.493M ³	165mm x 1.81M ³
Packaging	6 rows per carton, with up to 2 nested rows	
Install Suitability	Floating, direct glue	
Sub Floor Heating Suitability	Yes	
Install Over	Wood, concrete, plywood & particleboard flooring	
Colour Match Accessories	Aluminium trims & MDF wrapped scotia
